

SpineCare Delaware is SHARP

Delaware's entire OSHA Consultation office visited Newark, Delaware in April to induct SpineCare Delaware into the Safety & Health Achievement Recognition Program ([SHARP](#)). This program recognizes small businesses whose injury and illness prevention plans and procedures are exemplary.

Below are Photo Highlights from the induction ceremony:

SpineCare Delaware is the ONLY healthcare facility and the ONLY ambulatory surgery center to achieve SHARP status, in Delaware. SpineCare Delaware is proud to be one of seven businesses in Delaware, and fewer than 1000 nationwide, to have achieved this status.

Occupational Safety & Health Consultation (OSHA) Administration and Staff, explains the SHARP program and talks about the process that SpineCare Delaware followed and the standards that we achieved in order to qualify for SHARP status.

Acceptance of SpineCare Delaware into SHARP from OSHA is an achievement of status that singles you out among your business peers as a model for worksite safety and health. Upon receiving SHARP recognition, OSHA exempts your worksite from OSHA programmed inspections during the period that your SHARP certification is valid.
